

**CONDITIONS FOR GRANTING CREDITS FOR STUDENTS OF THE 2<sup>ND</sup> YEAR OF  
GENERAL MEDICINE  
SUMMER SEMESTER OF THE ACADEMIC YEAR 2023/2024  
MICROBIOLOGY I**

1. The student participates in a practical exercise with his/her study group in full extent. The student can complete a practical exercise during the semester with another group only if he/she has a special study plan.
2. It is only possible to substitute a practical exercise during the semester within the week for very serious reasons, after agreement with both participating assistants, after filling out the application (the form is available at the institute secretary and on the website of the Institute of Microbiology) and after the approval of the Head.
3. During each practical exercise, the student prepares a protocol. Credits in microbiology are awarded on the basis of active participation in all practical exercises and successful writing of 2 computer tests. The first test will be from General Microbiology and Bacteriology - a selection of questions, it contains questions from the lectures and practical exercises. The second test is written during the credit week and contains questions from General Microbiology, Bacteriology, Virology, Mycology and Parasitology, which are part of the set of questions for the written test before the exam in the winter semester and are published on the website. A minimum of 75% success must be achieved in the tests and they can be repeated a maximum of two times.
4. A student who cannot participate in a practical exercise for serious reasons must apologize and submit a confirmation of the reason for non-participation. The substitution of missed practical exercises and the writing of repeated tests are governed by the rules of the valid Study Regulations of the Medical Faculty and the relevant Orders of the Dean of the Medical Faculty. It will take place after the end of the entire course. Alternative dates for obtaining credits will be determined by the Head of the Institute. Those who do not receive a credit by August 31, 2024 can attend winter semester, however if students have no credit from summer semester, they are not allowed to proceed to take exam therefore they have to repeat summer semester to receive credit from summer semester. So, during summer semester next year they can sign for exam.
5. The final evaluation of the Microbiology 1 course will take into account the results of all control tests (even those not written in the regular and correction period).
6. A student who misses a practical exercise during the semester without serious and justifiable reasons, or who does not write any of the tests even after the second repetition, will not get credits from the Microbiology 1 course.
