

# List of Figures

1.1	Pressure changes in lungs in obstructive bronchitis and in emphysema . . . . .	22
1.2	Forced expirium curve in functional examination of lungs . . . . .	23
1.3	Disturbed transport of $\text{Cl}^-$ ions in cystic fibrosis . . . . .	28
1.4	Pressure relations in pleural cavity . . . . .	40
1.5	Mediastinal compartments . . . . .	42
2.1	Entry of blood cells from bone marrow into the sinuses . . . . .	44
2.2	Development of blood cells . . . . .	46
2.3	Structure of the red blood cell membrane . . . . .	49
2.4	Simplified scheme of blood clotting . . . . .	73
3.1	Isolated cardiomyocyte in scanning electrone microscope . . . . .	89
3.2	Surface of isolated cardiomyocyte in scanning electrone microscope . . . . .	89
3.3	Isolated cardiomyocyte in transmissive electrone microscope . . . . .	90
3.4	Intercalar disc of isolated cardiomyocyte in light microscope . . . . .	90
3.5	Contractile proteins . . . . .	91
3.6	Interaction of thin (actin, troponin and tropomyosin complex) filament and myosin one during contraction of the heart . . . . .	91
3.7	Metabolism of cardiomyocyte . . . . .	93
3.8	Calcium as an inductor of contraction . . . . .	96
3.9	Relationship between the power and speed of contraction . . . . .	98
3.10	Pressure curves of left atrium and left ventricle . . . . .	102
3.11	Hypertrophy and dilatation of the heart . . . . .	105
3.12	Hypertrophy and dilatation of the heart . . . . .	125
3.13	The most important endocrinological, metabolic and organic changes in stress . . . . .	142
3.14	Defect of atrial septum . . . . .	146
3.15	Defect of ventricular septum . . . . .	147
3.16	Ductus arteriorus apertus . . . . .	148
3.17	Fallot's tetralogy . . . . .	150
3.18	Development of the shock . . . . .	179
3.19	Acute decrease of blood pressure. The haemodynamic's fall down – see three bottom curves . . . . .	179
3.20	Relationship between % of blood pressure decrease and stroke volume of the heart . . . . .	180
3.21	Effect of lipopolysacharides in septic shosk . . . . .	185
3.22	Pathogenesis of ischemic arrhythmias . . . . .	204
3.23	Influx of ions in cell via the slow and fast channels . . . . .	213
3.24	Transmembrane action potential of cardiomyocyte . . . . .	215
3.25	Transmembrane action potential of sinoatrial node . . . . .	215
3.26	Sodium and calcium channels . . . . .	219
3.27	Activation of the atria and relationship between some vectors (left, right and maximal) . . . . .	221

3.28	T <sub>a</sub> wave . . . . .	222
3.29	Vector representation of ventricular activation . . . . .	223
3.30	Time course of ventricular activation . . . . .	224
3.31	Myocardial infarction of ventricular septum and anterior left ventricular wall . . . . .	226
3.32	Right bundle branch block . . . . .	227
3.33	Left bundle branch block . . . . .	227
3.34	Ascend phase 4th of transmembrane action potential of an automatic cells . . . . .	230
3.37	Relationship of excitability to TAP . . . . .	231
3.35	Automacity decrease in SA node . . . . .	232
3.36	Early and late postpotentials . . . . .	232
3.38	Unidirectional block of one Purkinje fiber . . . . .	235
3.39	Closed circuit in AV junctional region . . . . .	235
3.40	AV block of 2nd type, Mobitz type I. . . . .	238
3.41	AV block of 2nd type, Mobitz type II. . . . .	238
3.42	AV block of 3rd type . . . . .	238
3.43	Supraventricular extrasystole . . . . .	240
3.44	AV junctional extrasystole . . . . .	241
3.45	Ventricular extrasystole . . . . .	241
3.46	Parasystolia . . . . .	242
3.47	Recurred extrasystoles . . . . .	242
3.48	Atrial fibrillation . . . . .	243
3.49	Atrial flutter . . . . .	244
3.50	Supraventricular tachycardia . . . . .	244
3.51	W-P-W syndrome . . . . .	246
3.52	Ventricular tachycardia . . . . .	246
3.53	Ventricular flutter . . . . .	248
3.54	Ventricular fibrillation . . . . .	248
3.55	Endothel and some other vasoconstrictors . . . . .	254
4.1	Longitudinal section of the kidney . . . . .	258
4.2	Structure of glomerulus . . . . .	260
4.3	Glomerular capillary . . . . .	261
4.4	The epithelial cells of the tubules . . . . .	262
4.5	Glomerular filtration and the tubular function . . . . .	267
4.6	Mechanism for concentrating and diluting urine . . . . .	268
4.7	Bicarbonate exchange . . . . .	273
5.1	Steroid biosynthetic pathways in the adrenal cortex . . . . .	374
6.1	The etiopathogenic components of the epileptic proces . . . . .	460
8.1	Osteolytic osteolysis . . . . .	560
8.2	Pathogenesis of rheumatoid arthritis . . . . .	574
9.1	The metabolic pathway of arachidonic acid . . . . .	607
9.2	Different activation pathways of the complement system . . . . .	610
9.3	The intrinsic, extrinsic, and common pathways of the coagulation (clotting) cascade . . . . .	613
9.4	The kinin pathway forming bradykinin . . . . .	616
9.5	Inflammatory mediators that modulate hepatic APR synthesis in humans . . . . .	625
9.6	Mechanisms of leukocyte adherence to and transmigration across the endothelium . . . . .	628

---

10.1	Two-stage carcinogenesis: initiation and promotion . . . . .	642
10.2	A comparison of structure and expression of c-myb and v-myb . . . . .	645
10.3	Production and action of transforming growth factors (TGFs) . . . . .	647
10.4	Characteristic features of malignant cell . . . . .	649
10.5	Mitotic activity and differentiation of normal and malignant cells . . . . .	652
10.6	Tumor angiogenesis . . . . .	652
10.7	Pathogenesis of metastasis . . . . .	653
10.8	Factors contributing to cachexia in cancer patients . . . . .	654
10.9	Factors predisposing to infection in cancer patients . . . . .	655
10.10	Factors associated with anaemia in cancer patients . . . . .	656
10.11	Factors contributing to pain in cancer patients . . . . .	657
10.12	Protection of malignant cell from immunologic surveillance. Antibodies produced by B lymphocytes block the cell from destruction by T lymphocytes. . . . .	657
