

Key words index

A

- Abscess 18
- Absorption of iron **48**
 - in small intestine **511**
- Acetylcholine 24, **488**
- Acetyl-KoA 92
- Acetylosalicylic acid 298
- Achalasia 499
- Achlorhydria 51
- Acid-base disturbances 675
 - homeostasis **674**
- Acidosis 178, 280, **677**
- Acinus 9
- Acquired haemolytic disorders **57**
- Acromegaly 318, 565
- ACTH 177, 371
- Actin 48, 88
- Action potential **212**
- Acute cerebrovascular accident **207**
 - disseminated encephalomyelitis **453**
 - glomerulonephritis **288**
 - haemorrhagic leukoencephalopathy **453**
 - hepatitis **540**
 - myocardial infarction **199**
 - pancreatitis **508**
 - phase reactants 621
 - pyelonephritis **296**
 - renal failure **279**
- Adaptation **139**
 - to haemodynamic overload **119**
- Addison's disease 64, 138
- Adenocarcinoma 307
- Adenosine 24
- ADH 172, 258, **310**
- Adipose genital dystrophy **315**
- Adrenal glands **366**
 - cortex 367
 - medula 387
- Adrenaline 99
- Adriamycin 138
- Adult respiratory distress syndrome **35**
- Afterload **99**
- Aging 467
- Ahumad-de Castil syndrome 316
- AICD (automatic implantable cardioverter defibrillator) 247
- AIDS 70, 284
- Air pollution **20**
- Airways **21**
- Alarm reaction 141
- Albers-Schönberg disease **564**
- Albumin 536
- Alcalosis 381, **678**
- Alcohol 136, 472, **474**
- Aldosterone 107, 160, 258
- Allergic encephalomyelitis **453**
- Algodystrophic syndrome **494**
- Allergen 629
- Alpha-1-antitrypsin 22
- Alport's syndrome **296**
- Alveolar macrophages **17**
- Alveolar-capillar membrane 14
- Alveolitis **16**
- ALT 539
- Alzheimer disease **456**
- Amenorrhoea 314, 397
- Amoebiasis 472
- Amyloidosis 138
- Amylophagia 51
- Androgens **561**
- Anaemias **50**, 138, 655
 - acquired haemolytic disorders **57**
 - due to impaired haematopoiesis **65**
 - haemoglobinopathies **60**
 - haemolytic **55**
 - in endocrine disorders **64**
 - in hepatic cirrhosis **63**
 - in inflammatory processes **64**
 - in uremic syndrome **63**
 - megaloblastic **52**

- normochromic normocytic **62**
 - sideroblastic **51**
 - Anaphylatoxins **609**
 - Anaphylaxis 587, 629
 - Aneurysms 194, **210**
 - Angiitis 19
 - Angina pectoris 131, **197**
 - d'effort 197
 - unstable 198
 - Angiogenesis 600
 - Angiopathy 418
 - Angiotensin 107, 258
 - Anisocytosis 54
 - Ankyrin 48
 - Anorexia nervosa 284, **313**
 - Anosmia 315
 - Anthraxis **20**
 - Antibodies against basement membrane 285
 - Antithrombin 77
 - Aorta diseases **193**
 - Aortic insufficiency **132**
 - stenosis **130**, 148
 - Aplastic anaemia 65
 - ARDS **35**, 591
 - Arnold-Chiari malformation 450
 - Arrhythmias **228**, 342
 - treatment 248
 - Arterial hypertension **155**
 - Arteriolar nephrosclerosis **301**
 - Arteriosclerosis 210
 - Arthritis urica **575**
 - Arthus reaction **631**
 - Asbestosis **19**
 - Ascites **546**
 - Askanazy cells 351
 - Aspergillosis 19
 - Aspiration 16
 - AST 539
 - Asthma 19, **23**
 - Astrocytes **437**
 - Asymptomatic renal disorders 292
 - Atherosclerosis 145, **186**
 - Atopy 629
 - ATP 3, 92
 - depletion 115
 - ATPase 211
 - Atrial natriuretic peptide **265**
 - pressure curve 101
 - septal defect **146**
 - Atrio-ventricular node 217, **237**
 - Autoantibodies 285
 - Autoimmune haemolytic anaemias 57
 - Automacity **229**
 - Automatic cells **214**
 - Autonomous nervous system **480**
 - AV block **237**
 - Azotaemia 288
- B**
- Ba 212
 - Babinski–Froment syndrome **494**
 - Babinski–Fröhlich syndrome **315**
 - Backward failure **104**
 - Bacterial infections of brain **468**
 - Bacteriuria **296**
 - Balkan nephropathy **300**
 - Baroreceptors 154
 - Bartter's syndrome **302**, 382
 - Basophils 584
 - Bence-Jones protein 276
 - Benign tumors **653**
 - Berger's IgA nephropathy **292**
 - Bernard-Soulier syndrome 71
 - Beri-beri 138
 - Berylliosis **20**
 - Bile acids **537**
 - Bilirubin **538**
 - Bittner factor 645
 - Bleeding from GIT **531**
 - Block **225**
 - Blood **44**
 - brain barrier 206, **435**
 - cells **45**
 - marrow 44
 - pressure **152**
 - supply 300
 - transfusion 61
 - viscosity 87
 - Body temperature **634**
 - Bone **557**
 - marrow aplasia 65
 - resorption **568**
 - Bowman's capsule 259
 - Bradycardia 174
 - Bradykinin 73, 583
 - Brain **432**
 - circulation **205**
 - edema 209, **446**
 - haemorrhage 209

- injuries **443**
- oxygen supply **464**
- tissue atrophy **467**
- Breathing **8**
- Bronchial adenoma **36**
 - asthma **23**
- Bronchiectasis **26**
- Bronchitis **21**
- Bronchoconstriction **23**
- Brucellosis **80**
- Buffer system **60**
- Bulbar paralysis **478**
- Bundle branch block **225**
 - of His **220**
- Burkitt's lymphoma **84, 648**
- Byssinosis **20**

- C**
- C protein **68, 77**
- Cachectin **635**
- Cachexia **655**
- Calcitonin **561**
- Calcitriol **560**
- Calcium **94, 212, 271, 512, 557, 670, 677**
- Calcitonin gene-related peptide **555**
- Calyces renales **263**
- Cancer **647**
- Carbohydrate intolerance **282**
- Carbon dioxide **7**
- Carcinoma **354, 529**
- Carcinogenesis **641**
- Cardiac asthma **108**
 - cycle **101**
 - growth factor **121**
 - metabolism **92**
 - muscle **88**
 - structure **88**
 - syncope **171**
- Cardiomyocyte **88**
 - damage **115**
- Cardiomyopathies **135**
- Cardiovascular system **88**
- Catecholamines **177, 388, 483**
- Causalgias **494**
- Central cyanosis **111**
- Cell-mediated inflammatory reaction **624**
- Cellular exudate **583**
 - oncogenes **646**
- Cephalosporin **58**
- Cerebral infarction **466**

- Charcot artery **161**
- Charcot-Leyden crystals **26**
- Chemokines **619**
- Chemoreceptors **8, 154**
- Chemotactic factors **24**
- Cheyne-Stokes's respiration **113**
- Chiari-Frommel syndrome **316**
- Chloramphenicol **65**
- Chlorides **668**
- Cholecystitis **552**
- Cholecystokinin **553**
- Cholelithiasis **552**
- Cholestasis **550**
- Chondrohamartroma **36**
- Chronic bronchitis **21**
- Chronic diseases of airways **21**
- Chvostek sign **358, 672**
- Chylothorax **41**
- Circulation - functional anatomy **152**
 - brain **205**
 - extracorporeal **59**
 - renal **263**
- Circulus arteriosus Willisii **206**
- Cirrhosis **63, 543**
- Civilization diseases **144**
- Cl **28, 677**
- Claude-Bernard-Horner syndrome **494**
- Clot formation **614**
- CO₂ **8**
- Coagulation **69, 612**
- Coarctation of aorta **148**
- Cobalamin **53**
- Cold-antibody induced haemolytic anaemias **58**
- Cold-agglutinins **55**
- Colitis **527**
- Compartments **661**
- Compensatory pause **242**
- Complement system **608**
- Concussion **444**
- Conduction disorders **232**
- Conductive system of heart **217**
- Congenital heart diseases **145**
- Congestive heart failure **103**
- Cold cyanosis **110**
- Collagenoses **80**
- Coma **416**
- Conn's syndrome **164, 380**
- Constipation **519**
- Contractile function of myocardium **97**

– state 92
 Contractility 99
 Contraction-relaxation cycle **94**
 Cooley's anaemia 62
 Cor pulmonale 27
 Cori disease 438
 Coronary artery 148, **194**
 Cortex cerebri **432**
 Cough 9, 110, 172
 C-reactive protein 18
 Creutzfeld-Jacob disease 439
 Cretenism 332
 Crigler-Najjar syndrome 549
 Crohn disease 80, 516, **527**
 Cryoglobulinaemia **295**
 Cubot's ring bodies 62
 Curschmann's spirals 26
 Cushing's disease 138, **375**
 – habitus 377
 – reflex 154
 – syndrome 37, 165, 320, **375**
 Cyanosis 6, 25, **110**, 128, 149
 Cyclooxygenase 72
 Cyclophosphamid 138
 Cylinders 277
 Cyst 396
 Cystic fibrosis alveolar 27, **28**
 – pancreatis **510**
 Cystinuria 303
 Cystitis **296**
 Cytokines 595, 615
 Cytostatic treatment 54
 Cytotoxic reaction 581

D

Dalrymple symptom 343
 Dead space 9
 Defensins 588
 Degenerative diseases of CNS **454**, 476
 – disorders of joints **570**
 Deglutition **497**
 Dehydration **662**
 Demyelination diseases **451**
 Depolarization 95, **214**
 Dermatomyositis 138
 Diabetes insipidus 303, **310**
 – mellitus 138, 293, **404**
 Diabetic nephropathy **295**, 420
 – retinopathy 420
 Diaphragm **37**

Diarrhea 428, **517**
 Diastasis 101
 Diastole 95
 Diffusion **12**
 – capacity 13
 Digestion **511**
 Digoxin 99
 – like substances 122
 Dilatation of heart **124**
 Disseminated intravascular coagulation **76**
 Distribution of ventilation **12**
 Diuresis 155
 Diverticulitis **528**
 DOPA 455
 Down syndrome 437
 Drepanocytosis 60
 Drug 168
 – induced pneumonias 19
 Dubin-Johnson syndrome **549**
 Ductus arteriosus **147**
 Duodenum **499**
 Dust 31
 Dyschezia 520
 Dysmyelination diseases **454**
 Dyspeptic syndrome 110, **552**
 Dysphagia **498**
 Dysplasia olfactogenitalis **315**
 Dyspnoea **6**, 108, 127

E

Ebstein anomaly **149**
 ECG **224**
 Eclampsia **302**
 Edema 108, 291, 445
 Eicosapentaenic acid 191
 Ejection phase 103
 Elastase 285
 Electrical action of heart **211**
 Electrocardiogram 223
 Electrocardiographic changes 204, **224**
 Electrolytes **659**
 Embolization 127
 Emotional stress 25
 Emphysema 11, **22**
 Encephalomyelitis **453**
 Encephalopathies **472**
 – hepatal **546**
 Endocarditis 80, 132, **150**
 Endocrinal hypertension **164**
 Endocrine system **308**

– pancreas **404**
Endomyocardial fibrosis 138
Endothelial growth factor **603**
Endothelin **254**
Endothelium 66, **253**
– derived relaxing factor 253
Endotoxin 581
Energy 92
Endocrine disorders 64
Enteroglucagon **554**
Enteroviruses 470
Entropy 139
Enzyme 17
– liver **539**
Eosinopenia **81**
Eosinophilic pneumonias **19**
Epidermal growth factor **555**
Epilepsy **457**
– experimental 464
Epileptic seizures **462**
Epstein-Barr virus 644
Erb sign 358, 672
Erosions **505**
Erythrocytes **48**
Erythropoiesis impairment 280
Essential hypertension **157**
Estrogens **561**, 646
Ethanol **474**
Evaporation 634
Exchange of respiratory gases **13**
Excitability **231**
Exophthalmus 344
Expiration 7
Exsudation **583**
Extracellular fluid **660**
Extracorporeal circulation 59
Extrasystole 113, 231, **240**

F

Fabry's disease **296**, 438
Fanconi syndrome **303**
Farmer's lung **20**
Fat 512
Fatty acids 191
Fe 48
Febris **637**
Ferritin 48
Fever **634**
– of unknown origin 639
Fibrillation **247**

Fibrinogen 67
Fibrinolysis 74, **614**
Fibroelastosis of myocardium 138
Fibronectin 16
Fibrosis **28**
– lung 31
Flint-Austin's murmur 133
Fluids 283, **659**
Flutter **247**
Foeochromocytoma 138, 164, 387
Forward failure **104**
Frank-Starling mechanism **97**
Frequency of heart 100
Fridreich's ataxia 138
Fungi infections of brain **471**

G

G protein 486
GABA 455
Galactosemia 438
Galanine **554**
Gallbladder **552**
Gallop rhythm 111
Gargoylism 438
Gastrectomy 54
Gastric inhibitory polypeptide **555**
– juice 500
Gastrin 502, **553**
– releasing peptide **554**
Gastrinoma 428
Gastritis **501**
Gastrointestinal hormones **553**
Gastro-oesophageal reflux **498**
Gastrointestinal tract **496**
Gaucher disease 438
General adaptation syndrome **139**
Genetic information 140
Geophagia 51
Gierke disease 438
Gigantism 318
Gilbert's syndrome 548
Glanzmann's syndrome 71
Global hypoxia 5
Glomerular filtration **266**
– membrane 275
Glomerulonephritis 286, **288**
Glomerulopathies **288**
Glomerulosclerosis 291
Glomerulus **260**
Glucagon 99, **554**

- Glucocorticoids 145, 561
 Glucose 271, 410
 Glucose-6-phosphate dehydrogenase 56
 Glycocalyx 88
 Glycogenesis 138, 438
 Glycosuria 303, 414
 Goiter **325**
 Goodpasture's syndrome 31, 286, **296**
 Gout **575**
 Graefe symptom 343
 Graham-Steel's murmur 134
 Grand mal 463
 Granulocytes 79
 Graves-Basedow disease **340**
 Gravidity 167
 Growth hormone 64
 Gynecomastia 399
- H**
- H⁺ 3, **674**
 H₂ receptor 502
 HCl 502
 HCO₃ 679
 H₂O₂ 287
 Haematemesis 531
 Haematochezia 531
 Haematoencephalic barrier 206
 Haematologic system **44**
 Haematopoiesis **44**, 65
 Haematopoietic growth factors 45
 Haematuria **278**, 288
 Haemocoagulation **66**
 – disorders 72
 Haemodynamic overload **119**
 Haemoglobin **47**
 – glycosylated 419
 – unstable 61
 Haemoglobinopathies **60**
 Haemolysis 55
 Haemolytic anaemias **55**
 – uremic syndrome 301
 Haemophilia **74**
 Haemoptysis 36, 128
 Haemorrhage **210**, 445
 – intracerebral 467
 – intracranial 467
 – subarachnoid 467
 Haemorrhagic diatheses **74**
 Haemosiderin 49
 Haemostasis **66**
 – disorders 68
 Haemothorax 41
 Hairy cell leukaemia 83
 Hamartroma 43
 Harmful substances in air **19**
 Hashimoto disease **350**
 hCG 396
 Head injuries **442**
 Heart **88**
 – failure **103**, 135
 – left ventricular failure **107**
 – right heart failure **114**
 – therapy of heart failure 116
 Heat production **634**
 Heavy metals 138
 Heine-Medine disease 439
 Helicobacter pylori **505**
 Hemodynamic overload 119
 Henderson-Hasselbach equation 674
 Henle's loop 261
 Henoch-Schönlein purpura 72, 292, **296**
 Heparin 24, 78
 Hepatic cirrhosis 63, **543**
 – encephalopathy **546**
 – failure **543**
 Hepatitis 65, **540**
 Hepatocytes 536
 Hepatorenal syndrome **547**
 Hereditary glomerulopathies **296**
 Hermansky-Pudlak syndrome 71
 Hernia 43
 Herpes simplex and zoster 470, 645
 – labialis 638
 Heymann nephritis 288
 Hibernating myocardium **202**
 Hiccup 38
 Hirschsprung's disease 520
 Hirsutism 379
 His bundle 238
 Histamine 24, 502, 596, 605
 HIV infection 81
 Hodgkin's lymphomas 43, **85**
 Homeostasis 274, **674**
 Hormones of GIT **553**
 – and carcinogenesis **646**
 – influencing bone tissue **559**
 Horner's syndrome 42
 Howell-Jolly bodies 62
 Hydrocephaly **450**

- Hydroxyl radical 593
Hypercalcemic crisis 363
Hypereosinophilic syndrome 19
Hyperhydration **664**
Hyperkalaemia 228
Hypernephroma 307
Hyperoxic syndrom **466**
Hyperparathyroidism **361**
Hyperpituitarism 316
Hyperprolactinaemia **316**
Hypersensitive pneumonitis **18**
Hypersensitivity 628
Hypersplenism 59
Hypertension **155**
 – endocrinal 164
 – in cardiovascular diseases 166
 – in diseases of nervous system 166
 – in gravidity 167
 – intracranial **448**
 – paroxysmal arterial 389
 – portal **545**
 – postprandial 169
 – renal 162
Hyperthyroidism **339**
Hypertrophy of heart **119**, 124
 – concentric 124
 – dilatation 125
 – excentric 124
 – physiological 123
 – regression 123
 – stages 122
Hyperuricaemia 280
 – nephropathy **299**
Hyperventilation **11**
Hypocalcaemia 228
 – nephropathy **299**
Hypogonadism 323, 379
Hypokalaemia 228, 379
 – nephropathy **299**
Hypoparathyroidism **356**
Hypothalamic-hypophyseal system **310**
Hypothyroidism 138, **330**
Hypotension **169**
 – orthostatic 494
Hypoventilation 10, **11**
Hypoxia **4**
Hypoxic syndrom **465**
- I**
Idiopathic fibrosis of lung 31
IgE 24
IL-1,-6 635
Ileus **522**
Immune complexes 287, 629
 – system 628
Immunopathology 285
Infarction 199
 – brain 466
Infection 655
 – CNS 468
 – urinary tract **296**
Infective endocarditis **150**
Inflammation **577**
 – of GIT **526**
 – thyroid gland **348**
Inflammatory cells 30
 – disorders of joints **572**
 – mediators **604**
 – reaction 17, 64, 285, **578**
Inodilators 118
Inspiration 7
Insulin 404
Insulinoma 426
Integrins 624
Interleukin 17, 184, **620**
Interstitial lung diseases **29**
 – induced by drugs **32**
 – of known etiology **31**
 – of unknown etiology **31**
Intestinal obstruction **522**
Intestine **510**
 – large 514
 – small 510
Intracellular fluid **660**
Intracranial hypertension **448**
Intrinsic factor 53
Iodine 327
Ionising radiation 65, 83, 353, 579
Irradiation nephropathy **300**
Irritable bowel syndrome **521**
Iron **48**, 513
 – deficiency 50
Ischaemia of brain 154, 465
Ischaemic heart disease **196**, 422
 – angina pectoris 197
 – colitis **528**
Isoimmunization 630
Izometric contraction 101

J

Jacksonian epilepsy 462
James bundle 245
Jaundice **547**
Joints **557**
Juxtaglomerular apparatus **262**

K

Kalium 159, 212, 380, 677
Kallikrein-kinin system 258, 583
Kallmann's syndrome **315**
Katepsine G 27
Kent bundle 245
Keratitis ulcerosa 344
Ketoacidosis **677**
Ketonuria 414
Kidney 162, **257**
Kininogen 24
Kinin 24, **615**
Klinefelter syndrome 398
Krabbe disease 438
Kuru 439
Kussmaul respiration 415, 678
Kwashiorkor 138
Kyphosis 38

L

Lactoferrin 589
Lagophthalmus 344
Laplace law 100
Laryngospasm 359
Laurence-Moon-Biedl-Bardet syndrome **315**
LDL-lipoproteins 290
LDL-receptors 191
Lennox syndrom 463
Lepore thalassaemia 62
Leucocytes **78**
Leucocytosis **79**
Leucodystrophy 438
Leucopenia **80**, 656
Leukaemias **83**, 648
Leukoencephalopathy **453**
Leukotaxis 620
Leukotriens 24, 607
Libido 344
Lipid 512, **537**

- bioactive 596
- mediators 605
- metabolism disturbances 438

Lipoidosis **296**

Lipoxins 608
Liver **535**
Löffler's syndrome 19
Lungs 7
Lupus erythematosus 138, 293
Lymphocytes 17
Lymphocytopenia **81**
Lymphokinins 79
Lymphomas **85**

M

M protein 289

- receptor 488

Macroergic phosphates 121
Macrophages **597**
Macula densa **262**
Magnesium 159, 271, **670**
Mahaim bundle 245
Malabsorption **515**
Maldigestion **515**
Malignant haematologic diseases **81**
Mantoux reaction 633
Markers of tumor **648**
Marrow 44
Mast cells 24, 584
Masugi's nephritis 285
McArdle disease 438
Mediastinum **42**
Mediators of inflammation **604**
Megacolon **522**
Megaloblastic anaemias **52**
Melena 531
Membrane potential **212**
MEN syndrome 356
Meningoencephalitis 152
Metabolic acidosis **677**

- alkalosis **678**
- theory 5

Metastasis **651**
Metazoal infections of brain **471**
Methaemoglobinaemia 61
Mg 212
Microangiopathy 418
Microcirculation 178
Miction 172
Minerals 512
Mineralization **566**
Mineralocorticoid 372
Mitral stenosis **126**

- insufficiency **129**

- Mn 212
Mobitz type of block 238
Modan-Reaven syndrome 410
Moebius symptom 344
Monocytes 79, **597**
– chemoattractant protein 620
Monocytopenia **81**
Mononuclear phagocytic system 49, **597**
Morbus Osler-Weber-Randu 72
– Paget **568**
Motilin **554**
Motility of small intestine **513**
Motor neuron 477
